A REMINDER FOR PARENTS OF S.O.F. STUDENTS:

Make sure you walk your children into class and come back inside to pick them up from the classroom.

Never let your children use the restroom unattended. Children should always be attended by you, the parent. It was brought to our attention that a child was changing in the bathroom unattended while an adult walked in. The adult immediately notified the church staff. This is for the

safety of your child that these policies are in place. There are policies listed on each bathroom door. Many people walk into the church and we need to be proactive in safeguarding our children. We would appreciate all cooperation in this. It may help to have your child dressed and bathroom needs taken care of before entering the classroom
